-------------------------------------------------------------------------------------------------------------------------------------------------------------------------	------------------------------------------

Ecell Met Nashik is Student held Organization dedicated to fostering the spirit of entrepreneurship among students.

## Projects

<b>Repurposed Laptop Cloud Server</b> Repurpose HP EliteBook into cloud server with Lubuntu OS, i5 processor, 2GB RAM, 256GB drive.  <a href="#">Project details</a> The project entails repurposing an old HP EliteBook laptop into a cloud server by installing Lubuntu, an open-source Linux-based OS, to utilize the laptop's i5 processor, 2GB DDR3 RAM, and 256GB hard drive. The server, managed through CasaOS, operates services like Pi-hole, Jellyfin, qBittorrent, and WireGuard for ad blocking, media streaming, torrenting, and VPN connectivity. Future plans include deeper exploration of Docker and hosting a website on the server.
---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

<b>Portfolio Website</b> I have carefully selected a clean and modern layout that ensures ease of navigation and allows the focus to remain on the content. While the visual elements are still being fine-tuned, I am dedicated to delivering an aesthetically pleasing and user-friendly experience.  <a href="#">Portfolio Website</a> HTML, CSS, JS, BOOTSTRAP
--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------

## Skills

<b>Cloud Technologies</b> Google GCP, Heroku, Azure	<b>Language</b> C/C++, Bash, Python
<b>Bug hunting</b> Experience finding security issues in Web applications	<b>Compliance Frameworks</b> NIST
<b>Operating System</b> Kali Linux, Ubuntu, Windows, Parrot Security, BlackArch, Lubuntu	<b>Other Tools</b> Docker, postman, Virtual Box

Certifications

<b>Junior Penetration Tester (eJPT)</b> <a href="#">eLearnSecurity</a> 	May 7, 2024
<b>Fundamentals of Information Security</b> <a href="#">Infosys Ltd</a> 	January 2024
<b>Offensive Penetration Tester</b> <a href="#">Cybrary</a> 	December 2023
<b>Cloud Computing</b> <a href="#">NPTEL - IIT Kharagpur</a> 	November 2023
<b>Certified Network Security Practitioner (CNSP)</b> The SecOps Group	June
<b>Linux Fundamentals</b> <a href="#">HackTheBox</a> 	October 2023

Awards
